Report

Event Name: I Made It Possible

Date of Event: 2020-09-05

Place of Event: Google Meet

In-Charge Member: WIE-SPIT

On 5th September 2020, WIE-SPIT team hosted a webinar on women empowerment, sponsored by IEEE Bombay Section and WIE Bombay section. The speaker Anima Patil Sabale took the students on a thrilling ride of her journey full of ups and downs and how she made her most difficult dream of all come true. To top that she also motivated everyone on how to deal with criticisms and taunts that one has to face in life.

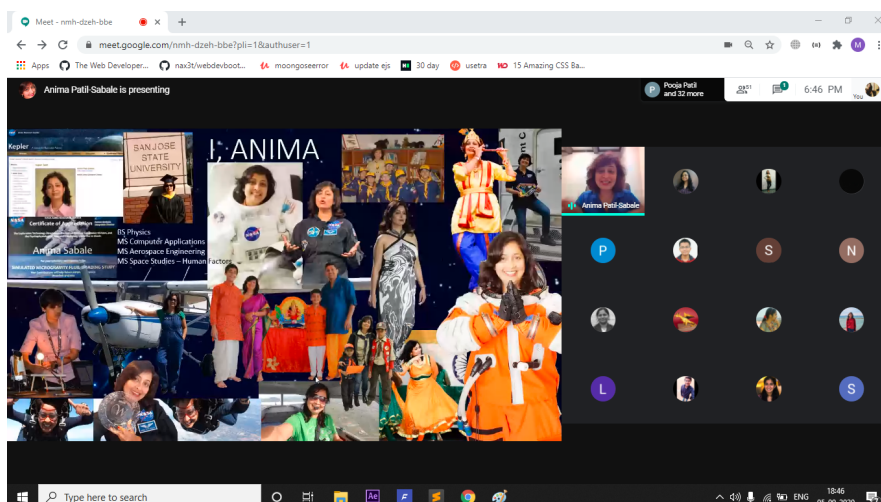

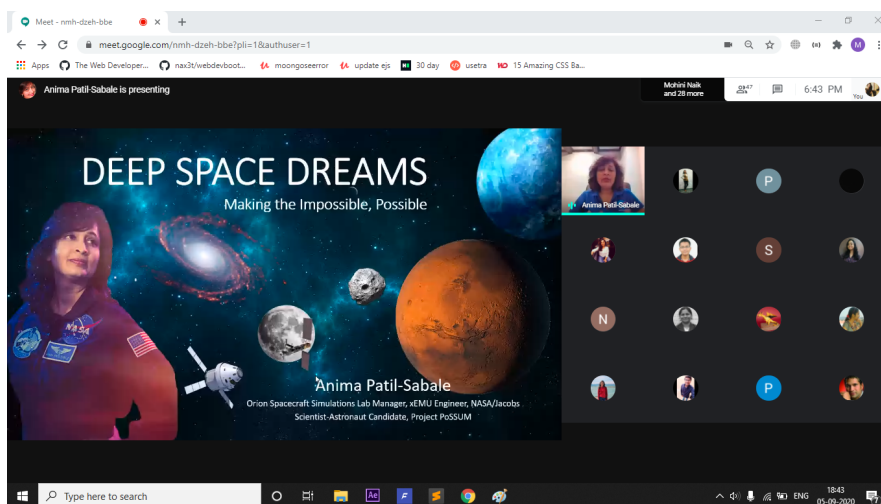

She is a Software and Aerospace engineer currently working at NASA's Johnson Space Center for Jacobs as Orion Spacecraft Simulations lab manager and xEMU Spacesuit Engineer. Her work has been recognised and appreciated by people everywhere. Her journey was really inspiring and relatable at some points which made the attendees feel a special connect with her. The webinar ended on a high note with the speaker giving the students advice and leaving them encouraged.

Key points:-

- ï,« Human possibilities are endless. In emergency situations, each person can tackle the impossible - and people who love to go to the extreme prove this perfectly.
- ï,« Achieving a goal is a wildly exhilarating thing. If youâ€™re flirting with the idea of giving up, you could be throwing away something wonderfulâ€•your best future.
- ï,« You are never too old to set another goal or to dream a new dream.
- ï,« There is no limit to what we, as women, can accomplish.
